Sun, 04 Nov 2018 07:28:00 GMT Quantum Hall Effect 1 - Chamon - In this note we demonstrate that vortices in a non-relativistic Chern-Simons theory form a quantum Hall fluid. We show that the vortex dynamics is controlled by the matrix mechanics previously proposed by Polychronakos as a description of the quantum Hall droplet. Thu, 01 Nov 2018 22:12:00 GMT A Quantum Hall Fluid of Vortices : David Tong : Free ... - Abstract: In  $d=2+1$  dimensions, there exist gauge theories which are supersymmetric but non-relativistic. We solve the simplest  $U(1)$  gauge theory in this class and show that the low-energy physics is that of the fractional quantum Hall effect, with ground states given by the Laughlin wavefunctions. between electrons into account. and it usually goes by the name GaAs (Gallium Arsenide if your chemistry is rusty). qhe-1 davidtong | Hamiltonian Mechanics | Condensed Matter -
