Please note that on small percentage of the recent split systems which are pressure rather than temperature driven, performance of Minus 60 versus the original refrigerant must be assessed on Sat, 10 Nov 2018 10:34:00 GMT Pressure Temperature Chart - HyChill Refrigerants - The Tecumseh chart, as you said is not for quick reference (it is much easier to use than the CERN one though) like the glossy pt charts we can get for the other refrigerants. I even looked on eBay and none of the charts there had the R600a.
